

GASOLINE BACKPACK SPRAYER 25L WITH BRASS PUMP (4 STROKE, 35CC)

Designed for power and durability, this 4-stroke backpack sprayer features a robust brass pump for consistent pressure and long-lasting performance. Its fuel-efficient, low-noise engine ensures comfort during long hours of use. Ideal for spraying pesticides, fertilizers, and disinfectants in both agricultural and professional applications.

USAGE OF MACHINE

Agricultural
Spraying

Horticulture &
Gardening

Disinfection &
Sanitization

Weed & Pest
Control

FEATURES

- **HIGH-PERFORMANCE BRASS PUMP**

Equipped with a precision-engineered brass piston pump that provides excellent pressure stability and corrosion resistance. Designed to handle a wide range of agricultural chemicals while maintaining long-lasting performance and smooth operation.

- **RELIABLE 4-STROKE ENGINE**

The powerful 35CC gasoline engine ensures superior efficiency and durability. It offers low fuel consumption, minimal vibration, and quiet operation — ideal for long hours in the field without fatigue.

- **STABLE AND UNIFORM SPRAYING**

With consistent pressure delivery up to 0.4 MPa, it ensures an even and effective spray pattern, reducing chemical waste and enhancing coverage across crops and surfaces.

- **LARGE 25-LITER CAPACITY**

The high-capacity chemical tank minimizes refill interruptions, allowing continuous spraying in large agricultural areas, orchards, or greenhouses. Made from durable, chemical-resistant materials for long service life.

- **OPERATOR COMFORT AND ERGONOMICS**

Designed with padded and adjustable shoulder straps, balanced weight distribution, and an easy-to-reach control system — ensuring maximum comfort during extended use.

- **VERSATILE FIELD APPLICATIONS**

Ideal for spraying pesticides, herbicides, and fertilizers, as well as sanitation and disinfection in public spaces, farms, and gardens. Built to perform efficiently in diverse working conditions.

TECHNICAL SPECIFICATIONS

Motor	35CC Gasoline, 4-stroke
Maximum Power	1.4 HP
Fuel Tank Capacity	0.6 Liters
Tank Capacity	25 Liters
Working Pressure	215–363 PSI
Maximum Pressure	508 PSI
Spraying Volume	5–8 Liters / Min
Pump Type	High-pressure piston pump
Pump Material	Brass
Starting System	Recoil

U.S.P

With outlet-pressure regulation - practical and precise
 Economical and low-vibration engine - more operator comfort
 2 long sprayers with straight tip - higher volume
 2 spraying nozzles - higher volume
 Brass pressure pump
